Curious and analytical, I enjoy exploring data, building intelligent systems, and creating clean, functional software. I thrive where logic meets creativity, often taking the lead in driving ideas from concept to execution. Whether solving problems or collaborating with others, I value initiative, clarity, and continuous learning.

EDUCATION

K J Somaiya College of Engineering (Somaiya Vidyavihar University), Mumbai, India

Bachelor of Technology in Information Technology | Oct 2022 - July 2026

Cumulative GPA: 8/10

MH High School, Mumbai, India

Grade 12, Higher Secondary Certificate (HSC): 72.50% | Apr 2022

New Horizon Public School, Mumbai, India

Grade 10, Central Board of Secondary Education (CBSE): 87.9% | Jul 2020

PROJECTS

Revu: Customer Insight & Analysis Platform

September 2025

Tech used- Python, BeautifulSoup, Playwright, Gemini API, Docker, React

github.com/Revu

- Developed a full-stack web application designed to aggregate and analyze publicly available customer feedback, transforming unstructured text into structured business intelligence.
- High-quality summarization powered by configurable LLM usage (Gemini) with TextRank as a fast, offline fallback for deterministic summarization
- Established a complete CI/CD pipeline with GitHub Actions, enforcing code quality and automating testing (Pytest) for the backend API and worker modules.

GoPredict: ML-Powered Travel Time Prediction System

August 2025

Tech used- Python, XGBoost, Scikit-learn, React, Google Maps API, Meteostat API

github.com/GoPredict

- Developed a full-stack ML application to predict travel times in NYC and San Francisco using historical taxi trip data and advanced geospatial feature engineering.
- Achieved R^2 of 0.85+ with 15–20% improvement over baseline distance-based models, enabling optimized route planning and traffic management.
- Open-sourced on GitHub with 13 stars, 21 forks, and 15 contributors, showcasing strong community collaboration and adoption.

Invoase: Invoice Automation Application

February 2025

Tech used- MERN Stack (MongoDB, Express.js, React.js, Node.js), Tailwind CSS

github.com/Invoase

- Built a full-stack web application to digitize and streamline the reimbursement and sponsorship invoice process, cutting approval time from 4–5 days to just 3–4 hours.
- Engineered a multi-panel interface for students and accountants, allowing seamless invoice submission, approval tracking, and status visibility.
- Implemented a clean, responsive UI with Tailwind and developed modular backend logic for easy future extensibility and maintenance.

EXPERIENCE AND ACHIEVEMENTS

GirlScript Summer of Code – Open Source Contributor

September'25 - Present

Tech Used: React, Node.js, Express.js, PDFKit, HTML, CSS

- Contributed to UI enhancements in Neonest, improving usability and accessibility across the platform.
- Designed and implemented a PDF Export feature that allows parents to download feeding logs, vaccination records, and memories in a well-formatted, shareable, and offline-accessible report.
- Built secure frontend-backend integration, enabling authenticated data fetching, structured PDF generation, and seamless download from the browser.

LUBUS – WordPress Development Intern

June'24 - September'24

Tech Used: WordPress, Gutenberg Block Editor, Full Site Editing (FSE), HTML, CSS

- Contributed to WordPress dashboard navigation and block-based design workflows, enhancing the usability and responsiveness of web interfaces.
- Designed and developed custom WordPress themes using Full Site Editing and template hierarchies for scalable content management.
- Successfully delivered both single-page and multi-page responsive websites, gaining hands-on experience in modern WordPress development practices.

Microsoft Learn Student Ambassador – Alpha MLSA

January'24 - September'24

Tech Covered: Azure, Microsoft 365, Dynamics 365

- Selected as an Alpha-level ambassador in Microsoft's global student community.
- Completed foundational Microsoft training tracks, gaining hands-on exposure to enterprise-grade cloud tools and productivity platforms.

Smart India Hackathon (SIH 2023) – Finalist (Top 30 University Level)

July'23 - September'24

Tech Used: OpenCV, Python, Scikit-learn, Pandas, Matplotlib, Seaborn, Git & GitHub

- Engineered a motion amplification system to assist in vibrational analysis for the Ministry of Defense.
- Performed preprocessing and cleaning of video data to enhance signal clarity before applying motion amplification.
- Improved vibrational frequency amplification by 30% using MEMAD and SFD frameworks for precision diagnostics.

WhiteHat Jr – Swasth Tech Champs Initiative – Top 50 (India-wide)

August'21 - October'21

Tech Used: Thunkable X, Firebase, API Integration

- Built **Robust**, a mental wellness mobile app featuring mood tracking, meditations, educational content, and emergency SOS integration.
- Designed for high-impact usability to support individuals with mental health challenges across rural and urban demographics..

TECHNICAL SKILLS

- **Languages:** C, C++, Python, JavaScript
- **Web 2.0 Technologies:** HTML, CSS, Bootstrap, Tailwind, JQuery, NodeJS, Express.js, React.js
- **Tools:** Figma, Git & GitHub, Bash, Powershell, Power BI, Docker, Wordpress
- **Database Management:** MySQL, PostgreSQL, MongoDB
- **AI/ML:** Numpy, Pandas, Matplotlib, Scikit-Learn, Tensorflow, Keras

CERTIFICATIONS & ONLINE LEARNING

- Supervised Machine Learning: Regression and Classification - Stanford
- Advanced Learning Algorithms - Stanford
- 100 Days of Machine Learning - CampusX
- The Complete 2024 Web Development Bootcamp - London App Brewery
- Probability and Statistics for Data Science

LEADERSHIP & EXTRACURRICULAR ENGAGEMENT

Finance Secretary at BloomBox (E-Cell), K J Somaiya College of Engineering | Jul 2024 – Present

- Spearheading financial planning, budgeting, and fund allocation for entrepreneurship initiatives, ensuring optimal resource utilization and transparency.
- Co-led the marketing team and contributed to sponsorship outreach, helping secure funding and partnerships for flagship events.
- Actively involved in cross-functional leadership, aligning efforts across departments to ensure impactful event execution and team synergy.

Corporate Relations Wing Member at BloomBox (E-Cell), K J Somaiya College of Engineering | Jul 2023 – Jul 2024

- Coordinated and executed high-impact speaker sessions with leading entrepreneurs, reaching over 3000+ students.
- Led initiatives to strengthen industry relationships and secure collaboration opportunities for the club.
- Contributed to event planning, marketing, and execution, driving record participation and campus visibility.

Operations and Logistics Representative at Alumni Cell, K J Somaiya College of Engineering | Nov 2022 – Sep 2023

- Created detailed reports on event operations and logistics to guide future event planning and strategic decisions.
- Applied data-driven insights from event attendance and feedback to improve alumni engagement and experiences
- Collaborated with internal teams to ensure smooth execution of alumni events and initiatives
